Uniformity in Education

*378.SHRI ABU ASIM AZMI: Will the Minister of HUMAN RESOURCE DEVELOPMENT be pleased to state:

(a) whether Government have taken a decision for 'One Nation-One Education' in the country and if so, the details thereof;

(b) the States where this system would be initiated first and by when;

(c) whether keeping in view the most thickly populated State of Uttar Pradesh, to what extent this system would be beneficial; and

(d) the financial aid to be given to the State in this regard?

THE MINISTER OF HUMAN RESOURCE DEVELOPMENT (SHRI ARJUN SINGH): (a) to (d) there is no concept like 'One Nation-One Education' in the National policy on Education. Education is in the Concurrent List and the State Governments are free to devise their approaches and plans for Education. It is expected that all their initiatives will be within the framework of National Policy on Education. The National policy on Education, 1986, as modified in 1992, envisaged a National System of Education based on the principles embodies in the Constitution. The concept of national System of Education implies that, up to a given level, all students, irrespective of caste, creed, location or sex have access to education of a comparable quality. The National System of Education envisages a common educational structure. The 10+2+3 structure has now been accepted in all parts of the country. The National System of Education also envisages a national curricula framework which contains a common core along with other components that are flexible.

The Higher Education is governed by UGC and various regulatory agencies set up by various Ministries. These agencies ensure uniform recognition of credentials and also quality.
